\_\_\_\_\_

The Gateway Robotics Coaching Staff and adult chaperones are able to provide only BASIC first aid in treatment of minor illnesses or injuries. All other First Aid treatment will be obtained from medical personnel on site, or transporting the student member to the nearest facility. Upon injury of a member, parents will immediately be contacted, regardless of the severity of the injury. Only after discussion with a parent will any type of medical assistance be permitted. Please discuss with your child any current medical problems they may have, thus enabling them to provide responsible and accurate information when required. If your child is taking prescribed or over the counter medications, this must be the responsibility of you and your child. All medications should be in their original container with the student's name and directions. Robotics Staff and adult chaperones may not legally administer these medications.

### **Parents/Legal Guardians must sign the following:**

I/we hereby release the Gateway Robotics Staff and adult chaperones from any medical or legal liability while supervising Robotics team members, while unforeseen circumstances may result in injury or illness. In the event of an accident or illness, I hereby grant permission for my child to be transported to the nearest hospital or health facility for medical treatment and/or medicines as necessary.
